Ken:

Attached is the benchmark data of IM15 MS pH using the new smoking parameter. We are reviewing the methods received from Joe and you.

Thank you for your help in this nicotine study. If the amount from the 2nd pad is below your detection limit, please indicate the detection limit in ug/cig.

Frank

Frank
Attached is the writeup for the pH in smoke study which will be conducted in PTL. Call if you have any concerns.

As a note:
The nicotine breakthrough study is being conducted today. The analytical data should be available tomorrow.

Thanks
Ken<<File: pH in smoke procedure970919.doc>>
